

New Participation Requirement for ACN Specialists

What is the Requirement?

Beginning July 1, physicians are required to treat patients at in-network facilities at least 25 percent of the time to remain in good standing with ACN. ACN will regularly review physician alignment and network adequacy on a quarterly basis and adjust the specialist network as needed.

Cost Savings Analysis

\$3,000 (18%)

Savings for an in-patient hospital admission when the patient is treated by ACN physicians who regularly treat patients at in-network facilities.

\$750 (27%)

Savings for each outpatient facility event performed by ACN physicians who regularly treat patients at in-network facilities.

Benefits of In-Network Care Coordination

» PATIENT SATISFACTION

Reduces out-of-pocket costs for patients, regardless of the patient's health plan/ insurance.

» HEALTH OUTCOMES

Better care coordination among ACN providers and facilities helps ensure better outcomes for your patients.

» MORE PATIENT REFERRALS

Greater in-network utilization leads to more referral opportunities from ACN's participating primary care providers.

Average Cost Savings for Services Performed by In-Network Providers
