[1] CAHPS measures combine responses to several questions, some of which have different response options (e.g., never, sometimes, usually, or always, and yes; definitely, yes, somewhat, or no). Performance rates for CAHPS measures do not represent a percentage but rather your ACO's mean (average) points. A domain improvement score less than 10% receives 0 Quality Improvement Reward points. This field will display "Not Eligible" if the measure is not eligible for use in the Quality Improvement Reward (e.g., your ACO did not completely report the measure in either the current or previous year); "Not Applicable" if the measure is new and thus not used in the Quality Improvement Reward; "Significant Improvement" if your ACO demonstrated significant improvement between last year and this year; "Significant Decline" if your ACO demonstrated significant decline between last year and this year; "No Significant Change" if your ACO did not demonstrate significant change between last year and this year; and "Held Harmless" if their performance on a measure significantly declined, but remained above 90% (or in the case of certain measures, above the 90th percentile benchmark) in both the current year and previous year. Significant improvement and significant decline are determined by a t-test at the 95% significance level.

[3] An ACO will be held harmless if their performance on a measure significantly declined, but remained above 90% (or in the case of certain measures, above the 90th percentile benchmark) in both the current year and previous year.

[4] For P4P measures: Points are calculated based on the ACO's performance compared to the 2018 quality measure benchmarks; For P4R measures: Full points are awarded if the ACO completely reports.

[5] The prior year performance rates for several measures have been updated. Specifically: performance rates in the Patient/Caregiver Experience domain have been updated to reflect the revised 2018 CAHPS for ACOs survey, to allow for comparability; the ACO-36 performance rate has been updated to correct a non-material technical error, as announced in the Next Generation ACO newsletter.
