Arizona Care Network — Childhood Immunization Status

PATIENT POPULATION:
Children turning 2 years of age during the measurement year.

NUMERATOR COMPLIANCE:
Children 2 years of age who had all appropriate vaccinations by their second birthday. Vaccines include:

- » Four diphtheria, tetanus and acellular pertussis (DTaP)
- » Three polio (IPV)
- » One measles, mumps and rubella (MMR)
- » Three haemophilus influenza type B (HiB)
- » Three hepatitis B (HepB)
- » One chicken pox (VZV)
- » Four pneumococcal conjugate (PCV)
- » One hepatitis A (HepA)
- » Two or three rotavirus (RV)
- » Two influenza (flu)

EXCLUSIONS
- » Members using hospice services during the measurement year
- » Anaphylactic reaction to any vaccine or its components
- » **For DTap Vaccine:** encephalopathy with a vaccine adverse-effect code
- » **For MMR, VZV, and Influenza Vaccines:** Immunodeficiency, HIV, Lymphoreticular Cancer, Multiple Myeloma or Leukemia
- » **For Rotavirus Vaccine:** History of Intussusception or Severe Combined Immunodeficiency

DOCUMENTATION REQUIREMENTS
Documentation with names of all antigens **and** the dates the vaccines were administered.

- » **For Hep A, Hep B, MMR, or VZV:** Documented history of the illness or a seropositive test result meets compliance (if occurs prior to a child's second birthday)
- » **For Rotavirus:** Always specify with "Rotarix®", "two-dose", "RotaTeq®", or "three-dose"

COMMON DOCUMENTATION INSUFFICIENCIES
- » Immunizations received after the second birthday
- » Documentation of "up-to-date with all immunizations" does not meet measure compliance unless it includes all immunizations and the dates administered
- » No documentation of allergies, contraindications, or illness

BEST PRACTICES

1 Set patients up on a schedule as soon as possible after birth to prevent them from falling behind. Identify and outreach patients who are behind on immunizations. Utilize ACN provider portal for assistance.

2 Educate parents on the importance of immunizations. Discuss any concerns and myths surrounding vaccinations.

3 Review immunizations at every visit. Implement workflow for identifying when immunizations are due and setting up reminders for providers.

4 Our care coordination team can provide patients with individualized support. To refer a patient please contact us:
602-406-7226 or 855-218-3451

CODE SUBMISSIONS TO CLOSE GAPS BY CLAIMS

Relevant codes that a primary care provider is the direct biller are listed below. Submission of these codes will close the quality gap through claims with the payer, especially when medical record review is unavailable.

CODE	VACCINE
90696, 90700, 90721, 90723	DTap
90698, 90713, 90723	IVP (Polio)
90708, 90710	MMR
90708	Measles/Rubella
90704	Mumps
90706	Rubella
90645-8, 90698, 90721, 90748	HiB
90723, 90740, 90744, 90747	Hep B
3E01254Z	Newborn Hep B
90710, 90716	VCV
90669, 90670	PCV
90633	Hep A
90681 (2-dose), 90680 (3-dose)	Rotovirus
90655, 90657, 90661, 90662, 90673, 90685	Influenza Vaccine
